GNU Public License v2 1991

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your

License Text

freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

License Text

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively

when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you

License Text

received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or

otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software

Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

License Text

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.
```

```
<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

Oniteo Platform Adapter License

PLATFORM ADAPTER

DISTRIBUTION of the Oniteo PLATFORM ADAPTER triggers the absolute obligation of ATTRIBUTION. This implies that the source code must contain the following reference:

This product uses the Oniteo PLATFORM ADAPTER developed by Oniteo AB. For more information see <http://www.oniteo.com>.

All advertising materials (including printed material and digital displays such as web pages) mentioning the Oniteo PLATFORM ADAPTER or use of the Oniteo PLATFORM ADAPTER, or software that uses the Oniteo PLATFORM ADAPTER, must display the following acknowledgement:

This product uses the Oniteo Platform ADAPTER developed by Oniteo AB. For more information see <http://www.oniteo.com>.

Use" shall also include the mere EXECUTION of the Oniteo PLATFORM ADAPTER without DISTRIBUTION.

The obligation of ATTRIBUTION of DEVELOPMENTS can be revoked by the Licensor following a separate agreement with the Licensor.

EXECUTION

This license agreement does not restrict the Licensee to execute the Oniteo PLATFORM ADAPTER. Neither does the License restrict the Licensee to use the Oniteo PLATFORM ADAPTER in a product directed to third parties. This however, triggers the obligations under ATTRIBUTION above.

DISTRIBUTION

The Licensee has the right to distribute the PLATFORM ADAPTER to third parties provided that the remaining obligations of the Agreement are met. If the PLATFORM ADAPTER is distributed to a third party it is the obligation of the Licensee to inform the third party of this license agreement and the obligation to give ATTRIBUTION to Oniteo when executing the PLATFORM ADAPTER.

MAINTENANCE

The Licensee is free to conduct MAINTENANCE to the Oniteo PLATFORM ADAPTER. The Licensee is not obliged to expose such modifications back to the provider.

DERIVED WORKS

This license does not restrict the Licensee to distribute DERIVED WORKS. Dynamic- and static linking does, however, trigger the obligations under ATTRIBUTION above.

All DEVELOPMENTS based on the Oniteo PLATFORM ADAPTER are permitted through this

license.

The obligations under ATTRIBUTION shall not apply to the DISTRIBUTION of any DEVELOPMENT

Oniteo Core Execution License

About Oniteo Licenses

This License agreement clarifies how the Licensee can handle the ADAPTERS in terms of EXECUTION, DISTRIBUTION, MAINTENANCE and DEVELOPMENT.

ONITEO has invested a lot of time and effort into the technology in the ADAPTERS. The CORE ADAPTER is developed by ONITEO and creates the basis of the technology on which all ADAPTERS except the PLATFORM ADAPTER are built. It is only natural that ONITEO wishes to protect this technology from illegitimate exploitation from third parties.

To make the technology useful to the Licensee ONITEO has divided the technology into different ADAPTERs where some of the technology is strictly confidential and some is open to the Licensee. It is the opinion of ONITEO that all parties benefit from this division of the technology. The PLATFORM ADAPTER is an extracted part of the CORE ADAPTER and its function is to provide an example to the Licensee of ONITEO technology without revealing the CORE technology. The PLATFORM ADAPTER provides the Licensee an opportunity to test and evaluate ONITEOs technology.

The FUNCTIONAL ADAPTER enables the Licensee to obtain access to some of the CORE technology to be able to modify it with the purpose to integrate it with the Licensee technology. This allows the Licensee to make modifications related to the CORE ADAPTER.

The FOSS and COMMERCIAL ADAPTER are created to identify and handle open source software and commercially owned software. Finally the LANGUAGE ADAPTER helps the software translating the technology into a LANGUAGE useful for operation.

All the ADAPTERS work together as part of a team and the division of the technology enables the Licensee to get access to parts of the technology that would otherwise have been a secret. The composition of ADAPTERS also makes it easy for the Licensee to try and evaluate the technology.

This licensing scheme promotes parties to conduct business with each other.

License Text

Definitions

ADAPTER

The ADAPTERS referred to in this agreement are PLATFORM, CORE, FUNCTIONAL, LANGUAGE, FOSS and COMMERCIAL.

APPLICATION OWNER (A.O.)

An Application Owner is a Licensee who will use the ADAPTERs in technology that eventually will be sold to an End User.

END USER (E.U.)

An End User is a customer licensing the ADAPTERs for its own use. An End User is at the end of the licensing chain

CONFIDENTIALITY

The components in the ADAPTERs are identified in appendix X with specifications on what level of secrecy is required for each component. The three levels of secrecy are Open, Confidential and Strictly Confidential.

Open: No restrictions regarding the confidentiality of the code.

Confidential: The source code is confidential and is covered by an NDA. Without such NDA you are not entitled to continue using this software and/or distribute the source code to third parties.

Strictly confidential: This source code is strictly confidential and is covered by a personal NDA. Without such NDA you are not entitled to continue using this software and/or distribute the code to third parties.

EXECUTION

To execute a computer program is the act of running the program. EXECUTION of an ADAPTER means running the ADAPTER, i.e. the process by which a computer carries out the instructions of the ADAPTER.

DISTRIBUTION

means to produce copies of an ADAPTER and transferring them to third parties. DISTRIBUTION also means to produce copies of an ADAPTER to use within the Licensees Company. DISTRIBUTION does not mean the making of backup copies not used unless there is an error in the original ADAPTER.

MAINTENANCE

is to conduct corrective measures to the Oniteo technology such as dealing with errors and correcting them. It is to change and adapt the technology in order to function with a software environment. It can also be to conduct measures aiming on increasing software maintainability and prevent problems in the technology in the future. MAINTENANCE does not constitute the DEVELOPMENT of DERIVED WORKS.

DERIVED WORKS

are works which contain an ADAPTER or portions of an ADAPTER, in whatever LANGUAGE or form, in which an ADAPTER has contributed to the function of the work. Contain does not include dynamic linking, but static linking to the ADAPTER. However, dynamic linking of the CORE ADAPTER and/or the PLATFORM ADAPTER is considered DERIVED WORKS.

DEVELOPMENTS are new programs designed to function with an ADAPTER. DEVELOPMENTS are not DERIVED WORKS. DEVELOPMENTS are new programs not based on an ADAPTER and independent from the ADAPTER.

CORE ADAPTER License

EXECUTION

This license restricts the Licensee to execute CORE on one specific physical target (CORE component utility) only. EXECUTION on additional physical targets will require the licensing of more CORE ADAPTERs in the Master Agreement.

DISTRIBUTION

This License does not grant the Licensee the right to make copies of the CORE ADAPTER with the purpose to transfer these to third parties.

The Licensee can purchase more than one CORE component and transfer components to an E.U. as long as the specific CORE component is not executed on more than one physical target.

MAINTENANCE

Depending on the level of confidentiality agreed upon between the Licensor and the Licensee in the Master Agreement MAINTENANCE can be allowed. MAINTENANCE of CORE as defined in this license requires that the Licensee has legitimate access to the source code obtained through the commercial terms in the Master Agreement.

Provided that the Licensee has legitimate access to source code the Licensee is free to conduct MAINTENANCE to the CORE ADAPTER. The Licensee is obliged to report the changes made on the CORE ADAPTER to Oniteo and acknowledge that the changes are the property of Oniteo.

DERIVED WORKS

Derived works of the CORE ADAPTER cannot be distributed to third parties or within the

License Text

Licensees company

DEVELOPMENT

An E.U can never obtain the source code (unless dual licensed). Provided that the (A.O) Licensee has legitimate access to the source code obtained in the Master Agreement all DEVELOPMENTS of CORE are permitted through this license. The Licensees DEVELOPMENTS will not be subject to the license terms of CORE. Such DEVELOPMENTS may, however, not be distributed to third parties without a commercial agreement between the Licensor and Licensee regulating such DISTRIBUTION.

DUAL LICENSING

If you obtained this component under a commercial license negotiated directly with Oniteo AB,
then such commercial license has legal precedence over the GPL alternative provided that it is adhered to.
Maintenance of components submitted to Oniteo must be legally disclaimed by the author prior to be accepted.
